PROJECTS:

1. HRMS / ERP / CRM Web Applications Development

Tech Stack: HTML, CSS, JavaScript, Bootstrap, Angular, SCSS

- Developed responsive dashboards and pages for HRMS, ERP, and CRM applications, improving usability and navigation.
- Optimized cross-browser compatibility and page performance for enhanced user experience.
- Collaborated with UI/UX designers to create intuitive interfaces and seamless user journeys.

HRMS Application Development in Angular

- Led the development of a scalable HRMS app using Angular, focusing on reusable components and responsive design.
- Integrated REST APIs for real-time data updates and dynamic content rendering.
- Ensured smooth performance across multiple devices and platforms, prioritizing user experience.

2. E-Commerce Web Application (Personal Project - React.js)

Tech Stack: React.js, Redux, Bootstrap, JavaScript, Axios

- Built a fully responsive e-commerce platform, implementing product listing, filtering, and cart management.
- Integrated REST APIs using Axios and handled state management using Redux Toolkit.
- Implemented React Router for navigation and optimized performance with lazy loading.
- Used Redux DevTools for debugging and tracking state changes
